

Save Our Forest

Made by Lajos Csizmadia 7.b

**The forest is the lungs of the Earth.
Trees produce oxygen.**

**The forest is home to living things,
plants and animals.**

Very good walking in the forest. The air is fresh and nice sight.

Don't be loud in the forest,
because you scare animals.

**If you light a fire, put it out.
You can do a lot of damage.**

**If a tree is cut down, plant
another. Use recycled paper.**

Don't throw away a trash in the forest.
